Utilities

**NUTRANSMISSION**

Helping you make the **VITAL LINK**  
to customers

## ESTABLISHED REPUTATION

We're known by our partners as trusted, innovative and collaborative problem solvers. NU drives for the best technical and most cost-effective reliability and public policy solutions for customers. We're also:

- An Edison Award winning transmission owner and service provider
- Experts in building, owning and operating transmission facilities
- A transmission owner with \$4.5 billion in transmission rate base, having placed \$4.2 billion in service since 2006
- A successful navigator of evolving legislative and regulatory landscapes
- Proud to be AAA rated by Standard & Poor's

# WHY CHOOSE NU?

Because developing and delivering transmission solutions is what we do. Northeast Utilities (NU) has:

- A proven track record of superior execution and results
- An unwavering commitment to our partners and stakeholders
- A broad application of technologies
- Exceptional financial strength
- The ability to deliver reliability, environmental and economic benefits to customers
- Established relationships with outstanding industry service providers

Call us — we look forward to contributing to the success of your transmission project.

## STRONG COMMITMENTS

NU's commitments to our communities, customers and stakeholders permeate all we do. Count on us to meet your transmission needs while also delivering:

- A safety-focused culture
- Technical strength and know-how
- Cost-effective design and construction solutions
- A robust and reliable bulk power system
- Proactive environmental stewardship
- Excellence in regulatory compliance

## PROVEN SUCCESS

Our track record in delivering customer value reflects our capabilities in planning, siting and building diverse transmission projects. Some of our successes include:

- Completion of more than 500 distinct traditional and major capital projects throughout the past decade
- Delivering value to customers by significantly decreasing congestion costs in New England
- Attainment of the prestigious Edison Award for our Southwest Connecticut "4-Pack" of transmission reliability projects
- Execution of complex overhead, underground and underwater design and construction
- Fulfillment of major, multi-state projects in challenging urban, suburban and rural settings:
  - Bethel to Norwalk – \$337M
  - Glenbrook Cables – \$239M
  - Middletown to Norwalk – \$1.27B \*
  - Long Island Replacement Cable – \$155M \*
  - Greater Springfield Reliability Project – \$678M

\* Total costs among partnered companies

## BROAD EXPERTISE

The foundation of NU's operational excellence comes from decades of delivering results throughout the project life cycle. We are experts in:

- Tariffs and the planning authority interface
- System planning for reliability and public policy initiatives
- Using technology efficiently
- Siting major transmission projects across multiple jurisdictions
- Obtaining permits from federal, state and local regulators
- Constructing and commissioning transmission projects, including strategic outage planning in coordination with regional reliability authorities
- Conducting public education and outreach to ascertain the needs and concerns of customers and stakeholders
- Ensuring compliance with environmental, North American Electric Reliability Corporation (NERC) and cyber security standards
- Cost efficiently maintaining a large and growing, multi-state bulk power system
